EXPERIENCE

Software Engineering Intern – Planet Celluloid Pvt. Ltd. | Certificate

Nov 2025 – Dec 2025

AI Full Stack Intern

Remote

- Completed a hands-on training track covering 5+ modern AI tools, applying them across real development workflows.
- Ideated and built a production website end-to-end for the team, from concept through deployment.
- Collaborated with a 4-person team to integrate AI-assisted approaches into full-stack development tasks, cutting routine coding time by an estimated 30%.

Client Acquisition Intern – Venture Allocators | Certificate

Mar 2026 – May 2026

Mumbai, Maharashtra

- Maintained the Client Acquisition Tracker (CAT), reporting on pipeline and conversion metrics across 100+ tracked leads.
- Coordinated with internal teams to streamline onboarding, reducing average turnaround time by 20%.

PROJECTS

Cyra – AI Period Tracker | React, Supabase, Gemini AI, EmailJS | GitHub | Live

- Architected a full-stack AI period-tracking app in 8 days using React, Supabase, and Gemini 2.5 Flash, deployed live on Vercel.
- Enforced Supabase Row-Level Security to scope 100% of user health data across 10+ database tables; built passwordless OTP sign-up and automated reminder emails.
- Set up GitHub Actions CI/CD with 10 automated tests, enabling 100% automated deployment on every push and cutting release time from ~30 minutes to under 5.

CodeMerge – Daily Coding Tracker | JavaScript, Chrome Extension, OAuth 2.0 | GitHub

- Built a Chrome extension that auto-detects solved problems across 6 coding platforms and auto-commits them to GitHub, eliminating manual logging for 100+ daily submissions.
- Engineered a secure OAuth 2.0 PKCE login flow via a Cloudflare Worker proxy, keeping the client secret out of the extension entirely.
- Hardened the proxy with rate limiting (60 requests/min) and minimum-required GitHub repo permissions, reducing the token's attack surface by scoping it to a single permission.

TrackFolio AI – Job Application Tracker | MERN, Gemini AI, JWT | GitHub | Live

- Built a MERN job-application tracker with AI resume-to-JD fit scoring via the Gemini API, giving instant compatibility scores in under 3 seconds per request.
- Implemented JWT-based auth with bcrypt hashing and a secure, single-use token password-reset flow via Nodemailer, reducing account-recovery friction to a single email.
- Designed 9 RESTful API endpoints connecting React/Tailwind to an Express/MongoDB Atlas backend, supporting full CRUD across 3 core resources.
